GENERAL PERSONALIZATION GUIDELINES

- Please do not include anything in the file that should not be printed on the book (such as homerooms, teachers' names, etc.).
- A person's name should be on the list once for every book he/she orders. If a child wants two personalized books, that name would be on the list two times. In the Option 2 example on the opposite page, Alexis is ordering two personalized books and others are ordering only one.
- If a family wants the names and/or photos of two children on one book, indicate this by leaving a space above and below the two names to go on the book. List the first name, the second name below it, and then leave a space before continuing the list. When you print out the hard copy of the names, please write "1 book" next to any book that has names on two lines. In the Option 2 example on the opposite page, AnnaMarie and Andrew would get one book with both of their names and photos on it—one above the other.
