

YBLive IS NOT PHOTO STORAGE SOFTWARE

Keep in mind that YBLive is not meant to replace the current online photo storage service you may be using.

Any images uploaded into your YBLive yearbook can be copied from the Candid's folder, but only in a lower-resolution format. This format is not print-quality, but may be sufficient for slide shows and the internet.

If there are any images you want to save for other projects, make sure that you receive permission to use these images that were intended for use in the yearbook.

You can download these images one-by-one by going to the "Photos" section of your book and selecting the Candid's folder that contains the photo(s) you want to download. Hover over the image until you see an "i" icon. Click on that icon and a larger version of the image will open.

Right click on the image and select "Save Image as" or "Copy Image". This will enable you to save the image on any online photo storage service, your hard drive, flash drive, DVD or any other external source.
